Made OF PAPER

It is not the best idea to wash paper. Surely, you know that. But what you probably do not know is that our paper bags are not afraid of getting wet. With synthetic latex impregnation, the cellulose that is used to manufacture them does not lose its properties even after laundering. The material which our bags and backpacks are sewn of is often referred to as leather for vegans because its production does not require the use of any ingredients of animal origin.

Umbrellas

for rainy
season

DID YOU KNOW...

The color of the print changes under the influence of water thanks to the use of hydro-chromatic inks. One of the most interesting uses of this feature are paintings made by South Korean designers. The project is called „Monsoon Projekt“ - from the monsoon season. The falling rain reveals the paintings made on the streets and promenades. Be sure to check it out!

DID YOU KNOW...

Originally, umbrellas were only used for protection from the sun or to cover the eyes from drastic scenes during gladiatorial fights in Rome. They became popular all over Europe in the 16th century, when Louis XIV used them to protect his precious wigs. The first umbrella shop was opened in London in 1830. Nobody expected that they would become one of the most popular promotional gifts.
