DID YOU KNOW...

Repotting houseplants is a must, as they grow and consume nutrients in the substrate. When the roots grow out of the holes in the bottom of the pot or... when they protrude over the edge of the pot - this is the time to move the plant into a larger container! Some people adopt the rule to replant plants every 2-3 years, but remember that some species, especially young ones, require a change of pot every year.
