# Lunch BOX

Container made of borosilicate glass.

1

Set of 3 borosilicate glass jars.

2

Borosilicate glass is more resistant to impact and breakage than traditional glass and does not react with most chemicals, making it an ideal material for food storage containers. Borosilicate glass is also more transparent than traditional glass, which translates into better visibility of the container's contents. A key advantage is that borosilicate glass is more resistant to temperature changes than traditional glass, meaning that the containers will not crack when exposed to heat.

3

Natural bamboo cap. Borosilicate glass.
