## Did you know...

At the beginning of the 18th century, the Swedish naturalist Carl Linnaeus planted the first flower clock in the Botanical Garden in Uppsala, Sweden. He created a round flower bed divided into 12 parts. The whole thing was based on the characteristic hours of opening and closing of petals for different types of flowers, so you could determine the time of day just by looking at the garden. If you do not have this type of garden, wall clocks also work well.
